To whom it may concern,

Hello, I hope this letter finds you well. I am Jared Webb, a future graduate of Michigan Technological University. My degree will finish Spring of 2023. Please accept this letter expressing my interest in Software Developer position at am Information Communications Technology.

My professional goals align with yours. First, I believe that a lot of industries and sectors have challenges that require information technology to make up its solutions. I saw on the companies website that K-12 remote learning was a unique challenge that the corporation is developing solutions for. I am very interested in that.

I would be a good fit for this position because I have experience with agile programming and its use of sprints. My teams and I have used these styles when developing our projects for SpartaHack 8, First Robotics Competition, CS3121 Team Software Project, and AP Computer Science. JavaScript is also a required skill. This was the first programming language that I learned seven years ago. I have been developing projects using JavaScript ever since. I hope to put these skills to use in the industry.

Thank you for your consideration and time. I hope we can stay in touch.

Sincerely,

Jared Webb
